RE: Fleet Wash – Environmental Services Center, City of Lynchburg Public Works

Dear Mr. Presley:

We are pleased to provide this letter of reference and acknowledgement of Hydrochem System's exemplary support during the recent construction and startup of the automated vehicle wash system for the Lynchburg Public Works Department.

Although our bid documents were not proprietary, Hydro-Chem Systems, Inc. was the only equipment provider that complied with our design specifications for this wash facility. Your personal attention and responsiveness in adapting your standard system configuration to the City requirements, including custom fabrication of the adjustable spray arches to accommodate the range of services within this facility demonstrated your commitment to meeting client expectations and set you apart from competing systems.

The integration of your system with the City's vehicle management system and base building components was also a complex challenge and your team worked closely with the general contractor to resolve startup "gremlins" in a cooperative and open manner.

We are very pleased with the final performance of this system and look forward to other opportunities to assist clients with similar requirements. We also appreciate your assistance in filming the facility training video and look forward to reviewing this footage in the coming weeks.

If we can be of any service in the future please contact me at 434.455.3209, or via e-mail to tfitzgerald@wileywilson.com. Thanks for all your efforts to make this a successful project for the City of Lynchburg.

Sincerely,
Wiley|Wilson
