

JET WASH

TECHNICAL DATA SHEET

Description: *HYDRO-CHEM'S "JET WASH" is a non-caustic, non-foaming liquid blend ideal for automatic parts washers. "Jet Wash" is a rust and corrosion inhibitor formula and is an excellent cleaner for steel, aluminum and most other types of metal.*

Advantages:

- Liquid formula avoids the "caking" and residue usually associated with powder blend detergents.
- Powder blends tend to clog nozzles.
- Safe for use in all types of parts washers; automatic manual aqueous parts washers and dip/soak tanks.
- Easy to measure and use.
- Anti-rust, anti-corrosion formula.

Specifications:

Physical Form:	Clear Liquid
Odor:	Non-irritating
Solubility:	Complete in water
Foam:	low to none

Directions:

IMPORTANT: SOLUTION MAY CREATE FOAM AT LOW TEMPERATURES <100°F.
VERY LOW FOAM AT 120°F
NON-FOAMING AT 40°F – 160°F

Automatic Parts Washers: 20:1 up to 10:1 (5% to 10% solution).

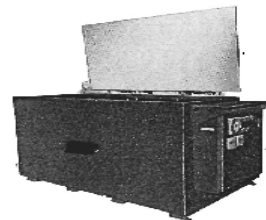

Manual Aqueous Parts Washers: 20:1 up to 10:1 (5% to 10% solution).

Dip/Soak Tanks: Can vary depending on temperature. Will usually be effective between 10:1 and 30:1.

Caution:

It is always advisable to do a small sample test of the cleaner on the type of parts you want to clean to insure compatibility of the material and the cleaner.
